

Fitting for Pex and Pex-Al-Pex pipe

101

/ Description

Fitting for Pex and Pex-Al-Pex pipe with Gas thread (3/4" Euroconus).

/ Technical data

Working fluids:	water and glycol solutions (max. 50 % of glycol)
Temperature range:	5°C÷110 °C
Minimum working pressure	10 bar

/ Working pipes

PE-X and Pex-Al-Pex cross-linked polyethylene pipes.

/ Components and materials

COMPONENT	MATERIAL
1. Loop	Brass Brass
2. Elastic ring	EPDM PVC
3. Internal o-Ring	Brass
4. Separation washer	EPDM
5. Adaptor	
6. External o-Ring	

/ Installation

1. Cut the pipe perpendicularly to its axis
2. Remove any residuals from the cutting
3. Flare the tube
4. Insert the cap on the tube
5. Insert the elastic ring on the tube
6. Lubricate the O-rings and internal surfaces of the tube
7. Insert the fitting into the tube until it stops
8. Connect the wide side of the fitting to the manifold
9. Tighten the loop on the manifold thread with a tightening torque of 40 N

/ Warnings

Applying a tightening torque of less than 40 Nm could compromise the correct functioning of the fitting.
