

Function

Lockshields are articles used to shut off and adjusting the flow rate of the heat transfer fluid to the radiators of air conditioning systems. Lockshields of this series are complete with nuts and unions that allow connection to the radiator in a simple and safe way. The connections for the pipes instead are specific to the copper pipe, multilayer and Pe-X with threads from M24X1,5, G1/2" and G3/8", and for iron pipe with threads from G1/2".
